Patent and Certification Status

Company-owned patent status

■ technology patent ■ Design patent ■ brand ■ Filing

Patent rights of the company's core technology
It is actively utilized and protected.

Patented Technology Product: Wireless interactive digital podium

-Retention status

- * Digital podium control method and device based on wireless communication
- * Digital podium started by electronic authentication
- * Wireless communication speaker with microphone
- * Wireless speaker performing group communication

-Core contents of technology

- * Core technology (different from existing technology)
 - Connect and control multiple devices based on two-way wireless communication.
 - Users can easily control and share all devices.
 - Group communication is divided into master and member.

Change the IP between each group to set up a small group, and operate by separating the communication between the whole group and the small group.

By using this technology, multiple devices can be connected at the same time, enabling 1:multi-communication.
